

# Get started in 2022. Free Video Conferencing.

Limited time offer, Galaxy 250 0x0 will include  
**3 years of FREE Video Conferencing.**

## Galaxy 250 - Office and Remote Worker Values:

Galaxy 250 provides all needed collaboration capabilities in your control.

Customer data is not in a shared environment like other Cloud providers. This keeps you securely connected to your office phone system from anywhere.

You can move your physical phone between office and home - no programming changes!  
Or you can hotdesk between your office phone to our soft-phone on your PC, Mac, or Mobile devices.

Galaxy 250 is NON-BLOCKING. This means that every user on the system can use it at the same time! Many other solutions, particularly cloud systems and virtualized platforms from other providers limit the number of simultaneous users that can make phone calls, use voice mail, video conference, or access other features. Everyone on Galaxy 250 can use it at the same time. This includes starting and hosting video conferences.

Galaxy 250 avoids the downtime that cloud users experience from interruptions, hacking, etc.

Galaxy 250 optimizes traffic between users in the office and users working remotely. This significantly reduces the traffic and voice quality issues experienced by cloud users due to their heavy reliance on internet bandwidth.

With Galaxy 250 no regular upgrades are required because assurance service is optional. So even without a service agreement with us the system will continue to function.

And the system comes loaded with features like:

Call Center, Voice Mail, Auto Attendant, Voice Mail to E-Mail, Find Me / Follow Me, Hotdesking, Unlimited SIP Trunk Ports, and a lot more.
